

Bear Wood Furniture

Montessori Bookshelf

Assembly Instructions

Please ensure you've read our 'Safety & Usage' document before you begin.

Please use the square pocket hole drill bit provided with an adjustable screwdriver. We advise you do not use power tools as they can over tighten the screws and damage the wood.

1. Open and lay out contents of package. You will notice each piece is labeled with a number, allowing you to simply match up the pieces using the numbers and guide lines marked on the wood (Picture 1).
2. Start by choosing one of the side pieces (the one with a rounded corner) and lay it marking side up. Be sure that the surface you assemble on is clean, as you're placing your finished exterior face down, and we wouldn't want it to get scratched!
3. Starting with the piece labeled '1', screw this into the side piece using the screws and square screwdriver 'bit' provided (Picture 2).

Note - You can either use a manual screwdriver which takes different bits, or an impact driver or drill. Be careful not to over screw.

4. Match the pieces as shown in the picture below. We recommend fixing pieces 1 & 7 first, ensuring they're flush to the top and bottom edge, and then working your way up or down from there.

5. Once the first side piece is secured, have the other side piece laying with the pencil marks up, and with the corners matching. Carefully flip the bookcase over onto the 2nd side piece (We recommend 2 people) - (Picture 3).

6. Align the side piece with the middle pieces and begin screwing ensuring all pieces are flush and the lines / numbers match (Picture 3 & 4).

7. Once all the numbered pieces are screwed into the 2nd side piece, go ahead and screw the middle screws (circled in picture to the left)

8. Once all pieces are screwed together, you should be able to flip it over onto its feet as shown on the right (Picture 5).

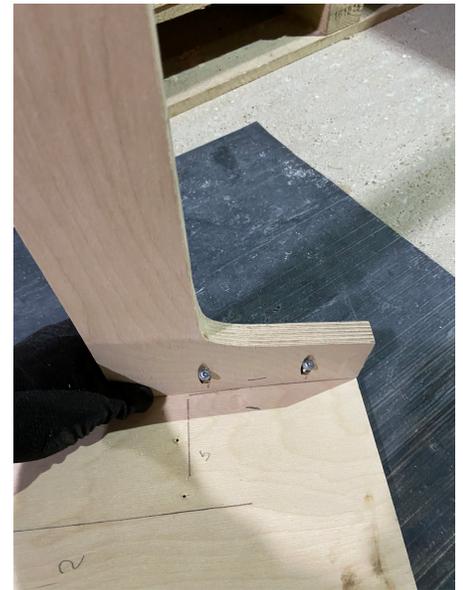

9. Use wall brackets provided to fix to skirting board / wall studs to ensure the product can't topple if climbed or knocked (Picture 6).

Please refer to our 'Usage & Safety' document for additional guidance. We hope you enjoy your new bookshelf!

Bracket Advice;

Use the smaller silver 16mm screws to attach the bracket into the furniture piece, pushing the bracket flush to the wall or skirting board.

Once the bracket is secured to the furniture piece, use the longer 30mm woodscrews to secure through the bracket and into the wall stud or skirting board (See Picture 6).

Test the furniture piece to ensure it can't topple or moved if pushed, knocked or climbed whilst in use.

Please refer to our 'Usage & Safety' document for additional guidance.
